High-security MaxProtect™ checks by Sage provide 30 security features

- 1 Foil hologram:** additional protection against duplication of the document.
- 2 Thermochromic heat-sensitive icon:** ink disappears when warmed by touch or breath and reappears upon cooling, immediately providing authentication.
- 3 Toner adhesion:** toner is nearly impossible to remove without visible damage to the paper.
- 4 Prismatic multicolored background:** subtle gradations of color make it difficult to copy or reproduce.
- 5 Chemically reactive paper:** uniquely treated paper creates stains, spots, or discoloration if chemicals are used to alter or wash checks.
- 6 Invisible fluorescent fibers:** embedded within the paper and visible only under ultraviolet light make reproduction nearly impossible.
- 7 Anti-counterfeiting dot pattern:** a pattern of dots helps prevent copiers from reproducing the check face image.
